Education	<p>Massachusetts Institute of Technology Cambridge, Massachusetts <i>June 2018 (Sophomore)</i> B.Sc. Candidate, Computer Science (6-3) & Mathematics (18), GPA: 4.7/5.0 Relevant coursework: Computational Linguistics, Computational Cognitive Science</p> <p>Uckfield Community Technology College East Sussex, United Kingdom <i>September 2007 - May 2014</i> A Levels: Maths A*, Further Maths A*, Physics A*, Electronics A*, Chemistry A, ICT A</p>
Experience	<p>Diffeo - Boston (Machine Learning Systems Engineering Intern) <i>January 2016</i></p> <ul style="list-style-type: none">• Developed Named Entity Disambiguator (NED) from latest NLP research• Created evaluation framework and Wikipedia-generated test corpus to compare NEDs <p>Amida Techology Solutions - Washington, D.C. (Software Developer) <i>May 2015 - October 2015</i></p> <ul style="list-style-type: none">• Amida uses technology solutions (primarily a MEAN stack) to solve real data problems• Created the backend of OrangeRx, a mobile medication adherence app currently in a 10,000-patient trial• Liased with overseas team working on the frontend <p>MIT Museum Studio, Holocam Project - Boston <i>February 2015 - May 2015</i></p> <ul style="list-style-type: none">• Developed a camera system that can be physically moved (4 degrees of freedom) around a hologram in the Museum, allowing remote users to control it in real-time via a web interface• Worked with a wide range of technologies, from AVR C to Rails <p>Open Access Button (Lead App Developer) <i>July 2014 - May 2015</i></p> <ul style="list-style-type: none">• Performed freelance work for this not-for-profit promoting open access to scientific research• Developed Android mobile app, Rails web app and Firefox extension for advocacy purposes <p>Rewired State - London (Freelance Data Developer) <i>July 2011 - January 2015</i></p> <ul style="list-style-type: none">• Performed data exploration, prototyping and ideation• Worked with a range of clients from governmental, corporate and not-for-profit sectors <p>Various Freelancing Projects <i>2011 - 2013</i></p> <ul style="list-style-type: none">• Developed Moodle TV Integration plugin for UCTC• Worked on gov.uk government portal with Government Digital Service
Projects	<p>Shor's Circuits <i>Summer 2014</i> Created a web-based graphical platform for symbolically simulating quantum circuits</p> <p>Bioniscope <i>Spring 2014</i> Developed the full stack (PCB to Android) of a digital sampling oscilloscope connected to a tablet interface over Bluetooth</p> <p>Hackathons Prizes and experience at more than a dozen hackathons. Notable recent ones include:</p> <ul style="list-style-type: none">• Young Rewired State Honourary Winner; development of a comprehensive social-media donation platform ('donate by retweet'); 2014. Mentor and finale judge for 1300 participants; 2015. Centre Organizer; 2016. Assorted awards; 2010-2013.• National Hack the Government Winner; applied motion detection algorithms to create a restaurant hygiene mobile app that interacts with the user completely passively (through vibrations); 2014• Research Councils UK Gateway to Research Winner; used machine learning to link entrepreneurs and small businesses to academic researchers; 2014• Hack for Social Impact Winner; combined financial information with Corporate Social Responsibility data to allow 'moral investment'; 2014
Skills	<p>Languages: Javascript, Ruby, Python, C, Java, HTML/CSS, Haskell, Objective C, Verilog Tools: vim, tmux, git, MongoDB, many APIs Frameworks: Node, Express, Mongoose, Rails, Android, Moodle, Arduino Operating Systems: Linux (Arch, Debian), OS X, Microsoft Windows Computational Software: Mathematica, Matlab, R, Octave Machine Learning Multiple years experience; online Stanford course Hardware 3D printers (and 3D printer development), oscilloscope design, quadcopters, laser cutters</p>
